

# Send SMS From Your Email: Secure, No Code Integration

Send and receive SMS messages from individual or shared company emails.

Increase your reach across multiple channels - without increasing your tech-stack - by connecting Email2SMS. The setup is simple, with no need to code or install additional software. Our platform converts the email into SMS, sends to a mobile, and converts their SMS back into an email in the sender's inbox.

## Features

- ✦ Global SMS routes
- ✦ Send & receive SMS via email
- ✦ Configure for 1-way or 2-way conversations
- ✦ Manage staff permissions
- ✦ Real-time, scheduled, or historical reporting
- ✦ Max-length protection

## Benefits of Modica's Email2SMS

### Easy Setup

Set up and configure your email2sms via our web-based UI; no additional development or downloads required.

### Security Options

Restrict allowed senders by domain, email, sender or IP. Manage staff access, or restrict recipients.

### Increase Your Reach

Gain multi-channel reach with SMS, without increasing your tech stack. Send global SMS to any mobile, via email.
